Last term in Year 4:

We have had a fantastic term learning all about the rainforest. The children explored different biomes around the world, discovered the layers of the rainforest, and learned about the lives of indigenous people. They also investigated the threats rainforests contend with, and the impact humans can have on these previous environments.

As part of our fieldwork, we spent time exploring our local area and analysing how and land is used. The children particularly enjoyed creating their own rainforest layers and designing their rain sticks.

A highlight of the term was our "Learn with me, Show me" event, where the children were able to bring their designs to life and share their learning with parents and carers. It was wonderful to see everyone working together and celebrating the children's creativity and hard work.

Year 4
Learning letter
Term 2

This term:

Year 4 will be continuing their learning with an exciting science-based learning journey with the title – 'Can I journey through the digestive system?'

This will see us learn about the digestive system and all the organs involved.

The children will also learn about teeth and the differences between humans and animals.

We are looking forward to mini-WOW moments which will see us taking part in several experiments and investigations.

Subject specific information:

English	Diary entry Explanation text Biography
Maths	Area Multiplication and division
Science	Quest to digest
D&T	Cooking: adapting a recipe.
RE	What makes some texts sacred?
Music	Clarinets
French	My town, your town.
Computing	Discovery coding
PE	Swimming and badminton.
